

651mSK VA

Diaphragm safety valves
made of stainless steel,
angle-type with
threaded connections

→ Series 651mSK VA

■ MATERIAL

■ SPECIFICATION

1/2"

- 10°C to + 120°C

2,0 – 10 bar

■ SUITABLE FOR

Solar heating systems

■ EXAMPLES OF USE

For the protection of:

- closed-circuit, intrinsically safe solar heating systems with water or water mixtures as a heat transfer medium, with permissible supply temperatures of up to 120°C.

As these valves are completely made of metal, they can also be installed at high environmental or radiation temperatures. All materials suitable for max. temperatures up to 160°C.

- intrinsically safe, thermal solar plants

For non intrinsically safe plants and temperatures >120°C please use the safety valves 451/851bG series or 452/852bGL series.

Safety valves are set and sealed at the factory.
